#### Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

# Contents

Preface	xiii	1.5.2 Potential Density	54
Acknowledgments	xv	1.5.3 Neutral Density	54
		1.5.4 Buoyancy and Static Stability	56
		1.5.5 The Stability or Brunt-Väisälä Frequency	56
		1.5.6 Dynamic Height	57
<b>1. Data Acquisition and Recording</b>		<b>1.6 Depth or Pressure</b>	62
<b>1.1 Introduction</b>	1	1.6.1 Hydrostatic Pressure	62
<b>1.2 Introduction to TEOS-10</b>	2	1.6.2 Free-Fall Velocity: The Expendable Bathythermograph (XBT)	63
1.2.1 A Brief History	3	1.6.3 Echo Sounding	68
1.2.2 Sea Pressure (Depth) in TEOS-10	4	1.6.4 Depth Measurement in Shallow Waters with Optical Satellite Imagery	72
1.2.3 Practical Salinity and Conductivity	4	1.6.5 Other Depth Sounding Methods	79
1.2.4 Absolute Salinity	5	<b>1.7 Sea-Level Measurement</b>	82
1.2.5 Simple Correction Factor Estimation	6	1.7.1 Specifics of Sea-Level Variability	82
1.2.6 Less Simple Correction Factor Estimation	7	1.7.2 Tide and Pressure Gauges	85
1.2.7 Conservative Temperature	8	1.7.3 Satellite Altimetry	89
1.2.8 Gibbs Function	10	1.7.4 Inverted Echo Sounder	95
1.2.9 Density	11	1.7.5 Wave Height and Direction	98
1.2.10 TEOS-10 and GSW in a Nutshell	12	<b>1.8 Eulerian Currents</b>	99
<b>1.3 Temperature</b>	12	1.8.1 Early Current Meter Technology	101
1.3.1 <i>In Situ</i> Sea Surface Temperature (SST) Measurement	13	1.8.2 Rotor-Type Current Meters	101
1.3.2 Satellite Sea Surface Temperature Measurement	18	1.8.3 Nonmechanical Current Meters	105
1.3.3 Subsurface Temperature Measurement	26	1.8.4 Acoustic Doppler Current Meters (ADCMs)	109
1.3.4 Salinity/Conductivity-Temperature-Depth (STD/CTD) Profilers	37	1.8.5 Comparisons of Current Meters	122
1.3.5 Potential Temperature	41	1.8.6 Electromagnetic Submarine Cable Measurements	125
<b>1.4 Salinity</b>	42	1.8.7 Other Methods of Current Measurement	128
1.4.1 Salinity and Electrical Conductivity	43	1.8.8 Mooring Logistics	131
1.4.2 The Practical Salinity Scale	46	1.8.9 Acoustic Transponder Releases	135
1.4.3 Nonconductive Methods	48	<b>1.9 Lagrangian Current Measurements</b>	137
1.4.4 Remote Sensing of Salinity	49	1.9.1 Drift Cards and Bottles	138
1.4.5 Satellite Salinity Summary	52	1.9.2 Evolution of the Modern Drifting Buoy	139
<b>1.5 Density</b>	52	1.9.3 Modern Drifters	141
1.5.1 Equation of State-1980	53	1.9.4 The Global Drifter Program	145

1.9.5	Processing Satellite-Tracked Drifter Data	149	2.3	Calibration	258
1.9.6	Drifter Response	150	2.4	Interpolation	259
1.9.7	Applications of GDP Drifter Data	154	2.5	Map Projections	260
1.9.8	Other Types of Surface Drifters	159	2.6	Data Presentation	261
1.10	Subsurface Floats	161	2.6.1	Introduction	261
1.10.1	Profiling Argo Pop-Up Floats	163	2.6.2	Vertical Profiles	264
1.11	Surface Displacements in Satellite Imagery	167	2.6.3	Vertical Sections	267
1.12	Autonomous Platforms and Underwater Vehicles	167	2.6.4	Horizontal (Plan-View) Maps	271
1.12.1	Wave Gliders	167	2.6.5	Characteristic or Property vs Property Diagrams	273
1.12.2	Saildrones	172	2.6.6	Histograms	275
1.12.3	Unmanned Aerial Vehicles (UAVs) or Drones	183	2.6.7	Time Series Presentation	276
1.12.4	Autonomous Underwater Vehicles (AUVs)	186	2.6.8	Other Forms of Graphical Presentation	280
1.12.5	Instrumenting Marine Mammals	189		Glossary	285
1.13	Wind Measurements	193	3.	Statistical Methods and Error Handling	
1.13.1	Satellite Measurement	197	3.1	Introduction	287
1.13.2	Reanalysis Meteorological Data	207	3.2	Sample Distributions	288
1.14	Precipitation	210	3.3	Probability	290
1.14.1	Hurricane Irma	214	3.3.1	Cumulative Probability Functions	292
1.14.2	Hurricane Harvey	214	3.4	Moments and Expected Values	294
1.14.3	Hurricane Zeta	216	3.4.1	Unbiased Estimators and Moments	295
1.14.4	Atmospheric River Brings Heavy Rainfall to Central California	216	3.5	Common PDFs	296
1.15	Chemical Tracers	217	3.6	Central Limit Theorem	300
1.15.1	Conventional Tracers	218	3.7	Estimation	302
1.15.2	Transient Chemical Tracers	233	3.8	Confidence Intervals	304
1.16	Oceanographic Data Formats	242	3.8.1	Confidence Interval for $\mu$ ( $\sigma$ Known)	305
1.16.1	Character Format	242	3.8.2	Confidence Interval for $\mu$ ( $\sigma$ Unknown)	305
1.16.2	Native Format	242	3.8.3	Confidence Interval for $\sigma^2$	306
1.16.3	Packed Binary Format	243	3.8.4	Spurious Significance and the Bonferroni Adjustment	308
1.16.4	Scientific Data Formats	243	3.8.5	Goodness-of-Fit Test	309
1.16.5	Merging of HDF and netCDF Glossary	244	3.9	Selecting the Sample Size	311
2.	Data Processing and Presentation		3.10	Confidence Intervals for Altimeter-Bias Estimates	312
2.1	Introduction	251	3.11	Estimation Methods	314
2.2	Basic Sampling Requirements	252	3.11.1	Minimum Variance Unbiased Estimation	314
2.2.1	Sampling Interval	253	3.11.2	Maximum Likelihood	315
2.2.2	Sampling Duration	254	3.12	Linear Estimation (Regression)	318
2.2.3	Sampling Accuracy	256	3.12.1	Method of Least Squares	318
2.2.4	Burst Sampling vs Continuous Sampling	256	3.12.2	Standard Error of the Estimate	322
2.2.5	Regularly vs Irregularly Sampled Data	257	3.12.3	Multivariate Regression	323
2.2.6	Independent Realizations	258	3.12.4	A Computational Example of Matrix Regression	324
			3.12.5	Polynomial Curve Fitting with Least Squares	326

3.12.6	Relationship Between Least Squares and Maximum Likelihood	326	3.20	<b>Extreme Value Analysis</b>	378
3.13	<b>Relationship Between Regression and Correlation</b>	326	3.20.1	Basics of Probability Distribution Functions	379
3.13.1	The Effects of Random Errors on Correlation	327	3.20.2	Probability Distribution Functions for Extreme Values	380
3.13.2	The Maximum Likelihood Correlation Estimator	328	3.20.3	Return Periods and Levels	387
3.13.3	Correlation and Regression: Cause and Effect	329	3.20.4	Extreme Data	392
3.14	<b>Hypothesis Testing</b>	331	3.20.5	A Recipe for Generating and Processing Extreme Value Records	394
3.14.1	Significance Levels and Confidence Intervals for Correlation	334	3.20.6	Worked Examples of Extreme Value Analysis	396
3.14.2	Analysis of Variance and the F-Distribution	335	3.20.7	Nonstationary Extreme Value Analysis	406
3.15	<b>Effective Degrees of Freedom</b>	337	<b>4. The Spatial Analyses of Data Fields</b>		
3.15.1	Basic Concepts	338	4.1	<b>Introduction</b>	411
3.15.2	A Simple Method for Estimating $N^*$	340	4.2	<b>Traditional Block and Area Averaging</b>	411
3.15.3	Estimating $N^*$ Using the Integral Time Scale	340	4.3	<b>Computer Contouring</b>	413
3.15.4	The General Formulation for $N^*$ for the Skill of a Regression Model	341	4.3.1	Interpolation: The Basic Problem of Contouring	414
3.15.5	The Long-Lag Artificial Skill Method	343	4.3.2	Indirect Method (Gridding)	414
3.15.6	The Pyper and Peterman Method	346	4.3.3	Indirect Method (Triangulation)	414
3.15.7	Trend Estimates	347	4.4	<b>Optimum Interpolation</b>	416
3.16	<b>Editing and Despiking: The Nature of Errors</b>	348	4.4.1	Optimum Interpolation: The Wilkin Code	422
3.16.1	Identifying and Removing Errors	348	4.4.2	Objective Mapping: Examples	422
3.16.2	Propagation of Error	353	4.5	<b>Kriging</b>	427
3.16.3	Dealing with Numbers: The Statistics of Roundoff	354	4.5.1	Mathematical Formulation	428
3.16.4	Gauss–Markov Theorem	355	4.6	<b>Empirical Orthogonal Functions</b>	433
3.17	<b>Interpolation: Filling the Data Gaps</b>	356	4.6.1	Principal Axes of a Single Vector Time Series (Scatter Plot)	438
3.17.1	Equally and Unequally Spaced Data	356	4.6.2	EOF Computation Using the Scatter Matrix Method	441
3.17.2	Interpolation Methods	357	4.6.3	EOF Computation Using Singular Value Decomposition	444
3.17.3	Interpolating Gappy Records: Practical Examples	363	4.6.4	An Example: Deep Currents Near a Mid-Ocean Ridge	446
3.18	<b>Covariance and the Covariance Matrix</b>	366	4.6.5	Interpretation and Examples of EOFs	446
3.18.1	Covariance and Structure Functions	366	4.6.6	Variations on Conventional EOF Analysis	451
3.18.2	A Computational Example	367	4.7	<b>Extended Empirical Orthogonal Functions (EEOFs)</b>	452
3.18.3	Multivariate Distributions	369	4.7.1	Applications of EEOFs	454
3.19	<b>The Bootstrap and Jackknife Methods</b>	369	4.8	<b>Cyclostationary Empirical Orthogonal Functions (CSEOFs)</b>	457
3.19.1	Bootstrap Method	370	4.9	<b>Factor Analysis</b>	461
3.19.2	Jackknife Method	375	4.10	<b>Normal Mode Analysis</b>	462
			4.10.1	Vertical Normal Modes	463
			4.10.2	An Example: Normal Modes of Semidiurnal Frequency	465

4.10.3	Coastal-Trapped Waves (CTWs)	467	5.4.4	Fourier Analysis for Specified Frequencies	528
<b>4.11</b>	<b>Self-Organizing Maps</b>	472	5.4.5	The Fast Fourier Transform	530
4.11.1	Basic Formulation	475	<b>5.5</b>	<b>Harmonic Analysis</b>	532
4.11.2	SOM Versus Principal Component Analysis	477	5.5.1	The Least-Squares (LS) Method	534
4.11.3	The Self-Organizing Map (SOM)	477	5.5.2	A Computational Example	536
4.11.4	Application to Estuarine Circulation in Juan de Fuca Strait	478	5.5.3	Harmonic Analysis of Tides	537
4.11.5	Growing Hierarchical Self-Organizing Maps	484	5.5.4	Choice of Constituents	538
<b>4.12</b>	<b>Kalman Filters</b>	485	5.5.5	A Computational Example for Tides	539
<b>4.13</b>	<b>Mixed Layer Depth Estimation</b>	493	5.5.6	Removal of Tides and Atmospheric Effects from Tsunami Records	541
4.13.1	Threshold Methods	494	5.5.7	Complex Demodulation	543
4.13.2	Step-Function Least-Squares Regression Method	495	<b>5.6</b>	<b>Spectral Analysis</b>	546
4.13.3	Integral Depth-Scale Method	496	5.6.1	Spectra of Deterministic and Stochastic Processes	549
4.13.4	The Split-and-Merge Algorithm	497	5.6.2	Spectra of Discrete Series	552
4.13.5	Hybrid Methods	498	5.6.3	Conventional Spectral Methods	554
4.13.6	Comparison of Methods	500	5.6.4	Spectra of Vector Series	562
<b>4.14</b>	<b>Inverse Methods</b>	502	5.6.5	Effect of Sampling on Spectral Estimates	567
4.14.1	General Inverse Theory	502	5.6.6	Smoothing Spectral Estimates (Windowing)	575
4.14.2	Inverse Theory and Absolute Currents	505	5.6.7	Smoothing Spectra in the Frequency Domain	583
4.14.3	The IWEX Internal Wave Problem	509	5.6.8	Confidence Intervals on Spectral Estimates	586
4.14.4	Summary of Inverse Methods Glossary	511	5.6.9	Zero-Padding and Prewhitening	589
		512	5.6.10	Spectral Analysis of Unevenly Spaced Time Series	591
<b>5.</b>	<b>Time Series Analysis Methods</b>		5.6.11	General Spectral Bandwidth and Q of the System	591
<b>5.1</b>	<b>Introduction</b>	515	5.6.12	Summary of the Standard Spectral Analysis Approach	592
5.1.1	Basic Concepts	515	<b>5.7</b>	<b>Spectral Analysis (Parametric Methods)</b>	596
<b>5.2</b>	<b>Stochastic Processes and Stationarity</b>	516	5.7.1	Basic Concepts of Parametric Methods	596
<b>5.3</b>	<b>Correlation Functions</b>	517	5.7.2	Autoregressive Power Spectral Estimation	598
5.3.1	Mean and Variance	517	5.7.3	Maximum Likelihood Spectral Estimation	604
5.3.2	Covariance and Correlation Functions	518	<b>5.8</b>	<b>Cross-Spectral Analysis</b>	606
5.3.3	Analytical Correlation/Covariance Functions	519	5.8.1	Cross-Correlation Functions	607
5.3.4	Observed Covariance Functions	521	5.8.2	Cross-Covariance Method	609
5.3.5	Integral Timescales	522	5.8.3	Fourier Transform Method	609
5.3.6	Correlation Analysis Versus Linear Regression	522	5.8.4	Phase and Cross-Amplitude Functions	610
<b>5.4</b>	<b>Fourier Analysis</b>	522	5.8.5	Coincident and Quadrature Spectra	612
5.4.1	Mathematical Formulation	523			
5.4.2	Discrete Time Series	525			
5.4.3	A Computational Example	527			

5.8.6	Coherence Spectrum (Coherency)	613	6.8	<b>Butterworth Filters</b>	692
5.8.7	Frequency Response of a Linear System	616	6.8.1	High-Pass and Band-Pass Filters	693
5.8.8	Rotary Cross-Spectral Analysis	619	6.8.2	Digital Formulation	693
5.9	<b>Wavelet Analysis</b>	625	6.8.3	Tangent Versus Sine Filters	695
5.9.1	The Wavelet Transform	625	6.8.4	Filter Design	695
5.9.2	Wavelet Algorithms	628	6.8.5	Filter Coefficients	696
5.9.3	Oceanographic Examples	628	6.9	<b>Kaiser–Bessel Filters</b>	698
5.9.4	The S-Transformation	630	6.9.1	A Low-Pass Kaiser–Bessel Filter	699
5.9.5	The Multiple Filter Technique	633	6.10	<b>Frequency-Domain (Transform) Filtering</b>	702
5.10	<b>Regime Shift Detection</b>	639	6.10.1	Truncation Effects	708
5.10.1	Sequential <i>t</i> -Test Analysis of Regime Shifts (STARS)	639		<b>Glossary</b>	710
5.10.2	Adaptive Kolmogorov–Zurbenko (KZA) Filters	643	<b>7. Machine Learning Methods</b>		
5.10.3	Cumulative Upwelling Index (CUI)	644	7.1	<b>Introduction</b>	711
5.11	<b>Vector Regression</b>	649	7.2	<b>Maximum Likelihood Analyses</b>	711
5.11.1	The 2-Parameter Complex Functional Approach	649	7.2.1	Directional Wave Spectra	711
5.11.2	The Vector Regression Model	650	7.2.2	Maximum Likelihood Estimators for Physical Oceanographic Equations	713
5.11.3	Wind Versus Surface Drift: The Six Characteristic Cases	654	7.3	<b>Decision Trees, Random Forests and Gradient Boosting</b>	715
5.12	<b>Fractals</b>	660	7.3.1	Decision Trees	715
5.12.1	The Scaling Exponent Method	662	7.3.2	Alternating Decision Trees for Cloud Masking in MODIS and VIIRS NASA Sea Surface Temperature Products	719
5.12.2	The Yardstick Method	663	7.3.3	Random Forest	724
5.12.3	Box-Counting Method	663	7.3.4	Naive Bayes	730
5.12.4	Correlation Dimension	666	7.4	<b>K-Means Clustering</b>	734
5.12.5	Dimensions of Multifractal Functions	666	7.4.1	Cluster Analysis of North Atlantic-European Circulation Types and Links with Tropical Pacific Sea Surface Temperatures	737
5.12.6	Predictability	667	7.4.2	Mapping Near Surface Global Marine Ecosystems Through Cluster Analysis of Environmental Data	738
	<b>Glossary</b>	669	7.5	<b>Support Vector Machines</b>	740
			7.5.1	Sea Level Prediction by Support Vector Machines Combined with Particle Swarm Optimization	744
			7.5.2	Classification of Sea Ice in the Baltic Sea with TanDEM-X Multiparametric Data Features and Support Vector Machines	747
			7.5.3	Bridging Observations, Theory and Numerical Simulation of the Ocean Using Machine Learning	753
				<b>Glossary</b>	753
<b>6. Digital Filters</b>					
6.1	<b>Introduction</b>	671			
6.2	<b>Basic Concepts</b>	672			
6.3	<b>Ideal Filters</b>	674			
6.3.1	Bandwidth	676			
6.3.2	Gibbs Phenomenon	677			
6.3.3	Recoloring	679			
6.4	<b>Design of Oceanographic Filters</b>	680			
6.4.1	Frequency Versus Time Domain Filtering	680			
6.4.2	Filter Cascades	681			
6.5	<b>Running-Mean Filters</b>	683			
6.6	<b>Godin-Type Filters</b>	685			
6.7	<b>Lanczos-Window Cosine Filters</b>	687			
6.7.1	Cosine Filters	687			
6.7.2	The Lanczos Window	689			
6.7.3	Practical Filter Design	689			
6.7.4	The Hanning (von Hann) Window	690			

<b>8. Neural Networks, Convolutional Neural Networks and Deep Learning</b>			
8.1 Introduction	755	8.14 Prediction of Basin-Scale Sea Surface Temperatures with Artificial Neural Networks	767
8.2 Models	755	8.15 Neural Networks for Oil Spill Detection Using ERS-SAR Data	771
8.3 Supervised Learning	756	Glossary	774
8.4 Classification	757	Appendix A Units in Physical Oceanography	775
8.5 Unsupervised and Self-Supervised Learning	757	Appendix B Glossary of Statistical Terminology	777
8.6 Fundamentals	757	Appendix C Means, Variances and Moment-Generating Functions for Some Common Continuous Variables	781
8.7 The Path to Deep Learning	758	Appendix D Statistical Tables	783
8.8 Linear Neural Networks	758	Appendix E Correlation Coefficients at the 5% and 1% Levels of Significance for Various Degrees of Freedom, $\nu$	793
8.9 The Structure of More Complex Neural Nets	760	Appendix F Approximations and Nondimensional Numbers in Physical Oceanography	795
8.10 Feed Forward Networks	761	Appendix G Convolution	801
8.11 Gradient Descent	761	Appendix H Optimal Interpolation MATLAB Live Scripts	805
8.12 Convolutional Neural Networks	762	References	825
8.13 Prediction of Sea Level Variations with Artificial Neural Networks	763	Index	859
