

Statistics of Extremes and Records in Random Sequences

OXFORD
UNIVERSITY PRESS

Great Clarendon Street, Oxford, OX2 6DP,
United Kingdom

Oxford University Press is a department of the University of Oxford.
It furthers the University's objective of excellence in research, scholarship,
and education by publishing worldwide. Oxford is a registered trade mark of
Oxford University Press in the UK and in certain other countries

Contents

Preface	vii
Notation	x
1 Introduction	1
2 The Two Principal Models and Some Basic Tools	15
2.1 A single random variable	15
2.2 Multiple random variables	18
3 First-Passage Probability	29
3.1 IID sequence	30
3.2 Random walk sequence	31
4 Extreme Statistics	57
4.1 The statistics of extremes for IID random variables: Maximum and minimum	57
4.2 Statistics of extremes of weakly correlated random variables	76
4.3 Statistics of extremes for a random walk: Maximum and minimum	77
5 Time of the Maximum and the Minimum	96
5.1 The statistics of t_{\max} and t_{\min} for IID random variables	96
5.2 The statistics of t_{\max} and t_{\min} for random walks	99
6 Order Statistics	111
6.1 Order statistics of IID random variables	113
6.2 Order statistics for random walks	125
7 Records	139
7.1 Record statistics for the IID sequence	141
7.2 Record statistics for random walks	163
8 Extremes in Other Correlated Systems	179
8.1 Ornstein-Uhlenbeck processes: Weakly correlated time series	179
8.2 Extreme statistics in the freely expanding Jepsen gas	185
8.3 Extreme statistics in the presence of a global constraint	188

vi	Contents	
8.4	Hierarchically and logarithmically correlated random variables	193
8.5	Extreme statistics for fluctuating interfaces in one dimension: An example of a strongly correlated random variable	198
8.6	Extreme statistics in random matrix theory	202
8.7	Extreme statistics in stochastic resetting systems	208
9	Conclusion and Perspectives	211
	References	212
	Index	233
